

Jordan Ellis

Experience

Operations Analyst, Northwind Logistics (2022-Present)

- Ran the weekly reporting cycle for a 40-person operations team, cutting the close from three days to one.
- Rebuilt the shipment tracking dashboard used by every regional manager.
- Trained four new analysts on the reporting pipeline and the data warehouse.

Junior Analyst, Northwind Logistics (2020-2022)

- Reconciled daily shipment records against carrier invoices, catching billing errors worth about 2% of spend.
- Wrote the first version of the automated exception report, still in use today.

Skills

- SQL, Python, and spreadsheet modelling for operational reporting.
- Comfortable owning a reporting pipeline end to end, from raw data to a dashboard a manager actually reads.
- Clear written communication, used to writing for both engineers and non-technical stakeholders.

Education

B.A. Economics, Riverbend University (2020)
